

Inspection Testing Installation

Are you up to date?

"Businesses have a duty of care to prevent any harm coming to your employees and customers. Your fixed wiring installation is conduit through which you deliver power to your customers. Is it safe ?

Why stop with the fixed wiring, we also conduct Portable Appliance Testing. With an influx of cheap foreign imports and clones, our instrumented testing will ensure their safe continued use.

Visual Inspection
Instrumented Testing
Detailed Reports

Home Owners. We offer peace of mind electrical checks with full reports. Many insurance companies hide in the small print the need for periodic inspections. These are usually conducted every 10 years. Over time the internal connections loosen due to copper creepage resulting in localised overheating and potentially ending in a fire.

- Simple fixed pricing structure
- We work to your schedule
- Comprehensive reports on completion
- Rectification work quoted for.
